EDUCATION

Master 2 Probabilités & Finance (ex DEA El Karoui) — Since Sept. 2026
École Polytechnique × **Sorbonne Université** Paris

Engineering cycle — From Sept. 2024 to July 2026
Telecom Paris Palaiseau
Track : Random Modelling and Data Science & Artificial Intelligence

CPGE — From Sept. 2022 to July 2024
Lycée Thiers Marseille, France
Preparatory Classes for French Grandes Écoles (CPGE), Mathematics and Physics (MPSI/MP)*

- Intensive two-year curriculum in advanced mathematics and physics.
- Preparation for highly competitive national entrance examinations.
- Admission to a leading French engineering school.

EXPERIENCE

CNN Based Trading Bot — Since Jan. 2026
Personal Project Outside school setting

Designed and developed an end-to-end automated trading system for BTCUSDT. Built a data pipeline from Binance API to MySQL, engineered 15 technical indicators encoded as 15×15 grayscale matrices, and trained a convolutional neural network with class-balanced loss for three-class signal classification. Implemented real-time inference on 15-minute candles with automated order execution and backtested against a Buy & Hold benchmark using Python, PyTorch, SQLAlchemy, and Pandas.

Statistical Arbitrage — Since July 2026
Personal Project Outside school setting

Built a statistical arbitrage system implementing pair trading on U.S. equities. Designed a five-stage cointegration testing pipeline (ADF, Johansen, KPSS, Phillips-Perron, Hurst exponent) to screen 30+ candidate pairs, estimated spread dynamics via Ornstein-Uhlenbeck modelling with OLS regression, and engineered a z-score-based state machine for signal generation with stop-loss logic. Backtested out-of-sample with capital simulation using Python, statsmodels, NumPy, and Pandas.

For more detailed information on these projects, visit matteocolin.fr.

STRENGTHS

Proactivity

Authored a prompt engineering booklet linking the theoretical study of Transformer models to prompt design best practices, supported by comparative experiments and performance analysis.

Discipline

Practised calisthenics regularly, reinforcing perseverance, consistency of effort, and the ability to progress on demanding technical objectives.

LANGUAGES

French
Native

English
C1

COMPUTER SKILLS

Data analysis
Pandas, NumPy, SQL, dataset preparation

Data Science & Machine Learning
Classical ML, model evaluation, Scikit-learn, PyTorch
